GITHUB: <https://github.com/Kaviin0211>

Aspiring Computer Science and Engineering graduate with hands-on experience in Software Testing, Java development, Blockchain applications, IoT systems, and Web Development. Experienced in designing, testing, and presenting software projects with a strong understanding of SDLC, STLC, Agile methodologies, and Manual Testing. Published IEEE research author with a passion for building reliable, secure, and scalable software solutions while continuously learning modern technologies.

EDUCATION

SATHYABAMA INSTITUTE OF SCIENCE AND TECHNOLOGY, CHENNAI — BE CSE

2022 – 2026

CGPA: 7.87

TECHNICAL SKILLS

LANGUAGES: JAVA

WEB & DATABASE: HTML, CSS, MYSQL

TESTING: MANUAL TESTING, SDLC, STLC, TESTING METHODOLOGIES, AGILE METHODOLOGIES.

BLOCKCHAIN & CRYPTO: Ethereum Smart Contract Deployment, IPFS/FILEBASE, Ascon Algorithm, METAMASK

TOOLS & PLATFORMS: Power Bi, Ms-Excel, Power Point, Word, Eclipse, Flask, Truffle Suite, Ganache, Esp8266.

PROJECTS

1. BLOOD BANK TRANSPARENCY SYSTEM USING BLOCKCHAIN & DECENTRALIZED STORAGE

2024 – 26

Stack: Ethereum (Solidity), Truffle, Ganache, React.js, IPFS/Filebase, ASCON Cryptography, MetaMask

- Designed end-to-end system architecture and data flow for a tamper-proof, blockchain-based blood bank platform ensuring donor/recipient transparency.
- Implemented ASCON lightweight cryptography (NIST-standardized) to secure sensitive records before on-chain storage, led full blockchain integration including smart contract deployment and IPFS-backed decentralized storage.

MY CONTRIBUTION

- Designed the complete system architecture and workflow.
- Performed end-to-end Manual Testing of the application.
- Designed project modules and user flow.
- Presented the project during reviews and technical demonstrations.

PUBLICATION

Enhanced Blood Bank Transparency With Smart Contracts And Decentralized Storage On Ethereum

ICAISS-2026

- Co-authored with [KAVIRAJAN K](#)
- IEEE Xplore (Scopus-indexed, Published) [PUBLICATION LINK](#)
- CARE College of Engineering, Tiruchirappalli

2. MOTION DETECTION ALERT SYSTEM - IOT

2023

Stack: Python, Flask, ESP8266, PIR Sensor

- Real-time IoT alert system integrating ESP8266 + PIR sensor with a Python Flask server for reliable hardware-software event-driven notifications.

MY CONTRIBUTION

- Designed the IoT system architecture.
- Tested complete hardware and software integration.
- Validated motion detection and alert functionalities.
- Presented the project and demonstrated system workflow.

3. ONLINE FORUM DISCUSSIONS PLATFORM

2023

Stack: Java Servlets, MySQL, HTML/CSS

- Multi-user discussion platform with topic threads, secure authentication, and server-side session management using Java Servlets and MySQL.

MY CONTRIBUTION

- Designed the application workflow and UI.
- Performed complete Manual Testing.
- Validated user authentication and discussion modules.
- Presented project features and functionality.

CERTIFICATIONS

1. IoT-Smart Home Automation-Techknots Academy LLP & Sathyabama University
2. Skill Forage - AI with Python Course
3. Full Stack Web Development-ExcelR (Jul - Oct 2024)
4. Java Programming - NPTEL
5. MATLAB: Onramp, Fundamentals, OOP, Programming Techniques – MathWorks

ADDITIONAL SKILLS

Leadership: Team Management, Team Leadership

Creative Skills: Photography, Photo Editing, Video Editing, Content Creation, Presentation Skills

Professional Skills: Problem Solving, Analytical Thinking, Time Management, Quick Learning

Sports & Achievements: Archery (National Level), Badminton (Inter-College), Billiards (District Level)

LANGUAGES

English (Professional)

Tamil (Native)

Hindi (Learning)
